

Postcards

Kindergarten – Fifth Grades
(ages 5-10)

Using a variety of postcards, ask the students to write a short message on the left side of the card about their trip to that location. They can write it to whomever they want. On the right side have the students properly address the card to the receiver. They can use a pencil or a small sticker for the stamp if it will not be mailed.

For younger students, explain that only real stamps can be used for sending postcards and letters.

* If the postcards will not be mailed and you want the students to create their own picture, use the template below to print postcards on white cardstock.
